

Vancouver Island Men's Therapy Centre Society

Reducing Criminal Behaviour in Youth Referral Form

Program:

Criminal behaviour has been linked to the experience of abuse and trauma in childhood. Our clinic is looking at this connection and how trauma therapy/counselling may help to reduce further crime and involvement in the criminal justice system among masculine identified youth aged 16-30. This program involves an intake and assessment session, 15 sessions of trauma therapy/counselling, as well as a post-program assessment session. We are offering these 15 weeks of therapy for free with full participation.

*Please scan or fill out and email completed form to simon@menstherapycentre.ca or fax to **(250) 381-3679**

Name:
